

Wibu-Systems N.V. opens new office in Benelux

**Wibu-Systems N.V. provides state-of-the-art software protection solutions Wibu-Key and CodeMeter in Benelux**

KARLSRUHE. The German security specialist Wibu-Systems AG starts a new partnership to provide their state-of-the-art software protection and content protection solutions in Benelux. The partnership will be with the company Wibu-Systems N.V. founded by Marcel Hartgerink who has 17 years experience in software protection. The software protection Wibu-Key, the Digital Rights Management solution CodeMeter and the document protection SmartShelter make up the product set offered by this partnership.

The Wibu-Systems product range offers many user-friendly functions for both the software vendor and the user. These include the establishment of different sales models such as demo versions, expiration dates, floating licenses, updates or Pay-Per-Use. With CodeMeter, -Systems have taken a giant step forward. The advantage of the CodeMeter solution is that it addresses the needs of both the vendors of software and digital content and the user – this creates a win-win situation for everyone.

The heart of the system is the CM-Stick, an encryption and storage solution in the form of a small USB device. The beauty of CodeMeter is that both the vendors and the users have the option of purchasing the hardware individually. CodeMeter gives the user many advantages including: mobile storage of thousands of licenses for different products from different vendors and purchase of software at a reduced rate on [www.codemeter.com](http://www.codemeter.com); personal security benefits like a password manager, secure login and file encryption with a virtual drive; plus optional integrated flash drive of up to 1 GB. There are additional content provider options such as

floating network licenses, precise usage measurement and expiration and activation date handling.

Marcel Hartgerink, C.E.O. of Wibu-Systems N.V., explains: "We are very excited that we can distribute the software protection solutions of Wibu-Systems AG in Belgium, the Netherlands and Luxembourg because all software vendors, content providers and users can rely on the secure, flexible solutions. My long-term experience has made me keep an eye on CodeMeter from an early stage. Now I'm pleased to provide all the advantages and opportunities of CodeMeter to software vendors, content providers and users, starting with our seminar tour on June 8 in Gent and the first trade show Tech-Ed in Amsterdam in July."
